+251916115888 | abubekercorax@gmail.com | Remote | <https://abubeker.dev/> | <https://github.com/itsabubeker>

SUMMARY

Full-Stack Developer with experience building scalable web applications and delivering high-quality interfaces for global clients. Strong analytical mindset with a focus on clean code, performance, and translating complex requirements into reliable products.

SKILLS

Languages | TypeScript, JavaScript, SQL
Frontend | React, Next.js, Tailwind CSS, Redux, Zustand, React Query
Backend | Express.js, Next.js API Routes, NestJS
Databases | PostgreSQL, MongoDB, MySQL

EXPERIENCE

- Full-Stack Developer, Venas Technologies (Remote)**

Jun 2025 – Present

 - Developed full-stack features across multiple client products — building frontend interfaces, backend API routes, and database integrations end-to-end.
 - Implemented complex system features including role-based access control, real-time data layers, and third-party API integrations, maintaining code quality across the full stack.
- Frontend Developer, Baseerah LLC (Remote)**

Mar 2025 – Jun 2025

 - Turned complex design specs into clean, maintainable frontend components.
 - Worked closely with designers to get the details right — layout, accessibility, the works.
- Freelance Full-Stack Developer (Remote)**

Sep 2024 – Present

 - Managed end-to-end delivery of custom web applications, from requirements analysis through deployment, with clear client communication throughout.

PROJECTS

- Time Delivery — Venas Technologies**

2025

Food delivery platform with admin dashboard, live map tracking, and RBAC

TypeScript | React | Next.js | Tailwind CSS

 - Led full frontend development the customer-facing app, admin dashboard, and delivery tracking interface.
 - Built a granular RBAC system managing distinct permission levels across customers, delivery drivers, restaurant managers, and platform admins.
 - Implemented live delivery map tracking, reflecting real-time driver location and order status updates across the system.
 - Architected a full i18n system supporting English, Pashto, and Dari with consistent LTR/RTL layouts across all views.
- Astrah OS — Venas Technologies**

2025

WhatsApp-native business OS for GCC companies (CRM, sales workflows, payments)

TypeScript | Next.js | Tailwind CSS

 - Owned the frontend end-to-end — from design decisions to implementation — building a complex multi-feature dashboard for non-technical operators.
 - Handled SEO, iterated on real user feedback, and maintained performance throughout a sustained development cycle.
- Doxiverse — Venas Technologies**

2025

Discovery platform and curated directory for healthcare tools

Next.js | Tailwind CSS

 - Translated designs to production, integrated third-party APIs, and tuned rendering performance for smooth browsing across a large dataset.

EDUCATION

Bachelor of Computer Science — Arba Minch University — GPA: 3.75 / 4.00 2024
